Schizzle's Warrior — WoW Forever launch manual

By Jon Shaw (Schizzle) · for WoW Forever 1.60.1 (build 70755, Interface 16001) · written Nov 3 2026

WoW Forever opens Wednesday Nov 4 at 6 PM EST (3 PM PST), after maintenance from about 1 PM EST. Raids (Barrow Deeps, Hyjal Summit, Onyxia's Lair) open Dec 9.

Schizzle's Warrior Setup F1.2 | Warrior Essentials v1.0 (Musca Auras) | XP & Rep Tray | Auctionator list | TSM plan

> **Why a manual and not one big import:** WeakAuras and TradeSkillMaster have no WoW Forever build yet, so the MoP rotation aura and TSM imports can't be used on day one. Musca Auras, a WeakAuras fork for Forever, runs a new visual helper instead (page 4). The helper addon does everything that can be automated; this sheet covers the rest, in order.

1. Put the addons in the Forever folder

1. Close WoW and Battle.net.
2. Open `C:\Program Files (x86)\World of Warcraft\_forever_\Interface\AddOns\`. Copy it somewhere safe first.
3. Copy in the Forever-ready addons (table below) and the `SchizzlesWarriorSetup` folder from the repo's **WoW Forever** folder.
4. Add **Musca Auras 1.14.0** for the visual helper. Its folder is called `WeakAuras`.
5. Leave **TradeSkillMaster**, **TSM AppHelper**, the original **WeakAuras** and **WagoAppCompanion** off on Forever.

Job	Forever-ready addons
Bars, frames, chat, map	Bartender4 4.18.4 · BetterBlizzFrames v2.2.0e · Prat 3.9.115 · SexyMap v12.1.4 · MinimapButtonButton · MoveAny (Forever)
Questing	Questie 12.5.0 · RXPGuides v4.11.30 · TomTom v4.4.0 · GatherMate2 · HandyNotes · RareScanner (Forever)
Combat	Details! (Camelot) · BigWigs v427.8 · GTFO 6.12.2 · BetterPersonalResourceDisplay · BetterBlizzMarkers · Platynator
Bags, gold, alts	Baganator 839 + Syndicator · Auctionator 341 · Altoholic + DataStore · Pawn (Forever)
Comfort	Leatrix Plus (Forever) · Speedy AutoLoot · BetterFishing · WowSimsExporter
Error catching	BugSack + !BugGrabber · BugTabs

2. First login: one click

1. At the character list, click **AddOns**. Nothing you rely on should say *Out of date*.
2. Log in on the Warrior. Click **Yes** on *Set up Schizzle's Warrior on this character?* (other classes get the general UI only: no keybinds, bars or aura pack)
3. Read the chat lines (one per piece: *done* or *skipped*), then click **Reload**. If the button does nothing, type `/reload`.

Piece	What it sets	Command
Console variables	auto loot, cast on key down, max camera zoom, enemy nameplates, target of target, full tooltips, **Cooldown Manager on**	`/schizzle cvars`
Keybinds	Bar 3 on Q E R F T G Y + mouse buttons; Shift versions on Bar 2; A/D strafe (account-wide)	`/schizzle binds`
Bartender4	three centred bars, bars 4-5 on mouseover, Fira hotkeys	`/schizzle bars`
Prat 3.0	Fira chat, short channel names, bronze timestamps	`/schizzle chat`
SexyMap	square 1.5x minimap, top right, bronze border	`/schizzle map`
Questie / GatherMate2 / TomTom	smaller icons, darker tracker, arrow at the top	`/schizzle quests` · `gather` · `tomtom`
Details!	the Schizzle's Warrior meter profile, imported and switched to	`/schizzle details`
XP & Rep Tray	XP, watched rep and guild rep bars under the meters	`/schizzle tray` (on/off)
Visual helper	opens Musca Auras' import window with Schizzle's Warrior Essentials: click **Import**, then `/reload` (not part of *all*)	`/schizzle auras`
Cooldown Manager	Blizzard's cooldown bars off or on; off keeps the HUD box for the pack	`/schizzle cdm`

> Every addon gets a new **Schizzle's Warrior** profile; old profiles are kept. Run any command again to put that addon back. In combat the helper waits.

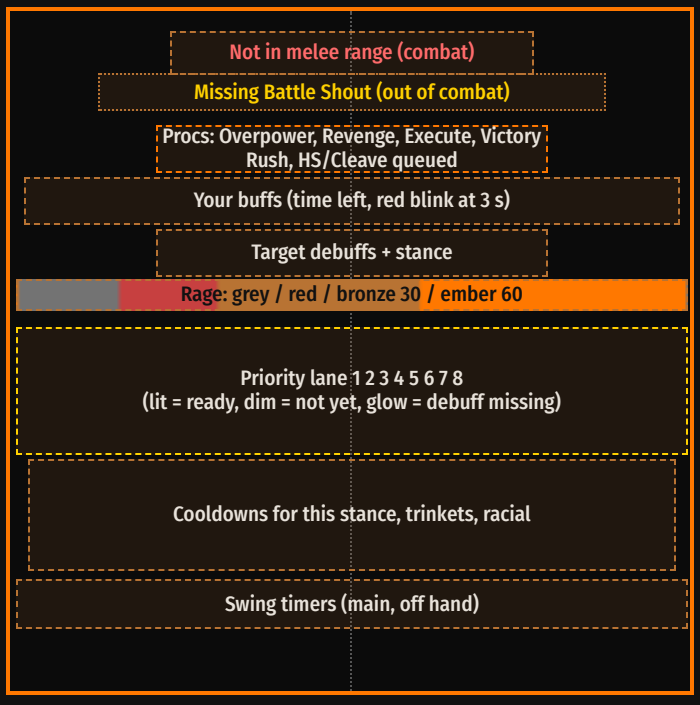

3. Where everything sits

The orange box in the middle belongs to the visual helper (page 4); nothing else goes there. Unit frames stay at Blizzard's spots. The tray is 500 x 34 px, 4 px from the right and bottom edges; the two Details! windows sit right on top of it.

4. The visual helper: Schizzle's Warrior Essentials

A Musca Auras pack that shows what's ready, what's missing and what to press next. **It never presses anything for you**: it's a visual helper, not a rotation bot. Install: Musca Auras 1.14.0, then `/schizzle auras` > **Import** > `/reload`, then `/schizzle cdm` to turn off Blizzard's Cooldown Manager, which would sit in the same spot.

Lane	Order (press the lowest lit number)
Starter (below 10)	Rend, Heroic Strike, Thunder Clap
Arms	Rend, Overpower, Mortal Strike, Slam, Execute, Victory Rush, Sweeping Strikes, Whirlwind
Fury	Bloodthirst, Whirlwind, Execute, Victory Rush, Slam, Rend
Protection	Shield Slam, Revenge, Sunder Armor, Shield Block, Demoralizing Shout, Thunder Clap, Victory Rush

The box at 1:1 scale: 340 px wide, from 120 px above the screen's centre to 220 px below; the group's centre is at x 0, y -40. The lane follows the talent tree with the most points (both lanes on a tie). Spells only show in the stance that can use them.

You see	Sound	It means	Do
Overpower lights up	water drop	the target dodged	Overpower now (Battle Stance)
Revenge lights up	water drop	you blocked, dodged or parried	Revenge now (Defensive Stance)
Execute lights up	robot blip	target under 20%	Execute beats everything in the lane
Victory Rush lights up	water drop	you got a killing blow	free heal and damage
Heroic Strike / Cleave shows	—	queued on your next swing	press again to cancel if you need the rage
Lane icon glows	—	Rend, Sunder, Thunder Clap or Demo Shout missing (Rend: due a refresh)	put it back up
Lane icon dim / red / blue	—	not usable yet / out of range / short of rage	press the next lit number
Rage grey / red / bronze / ember	—	under 15 / 15-29 / 30-59 / 60+	bronze: room for HS or Cleave; ember: spend it
Buff blinks red	—	runs out in 3 seconds	refresh it if it's yours to refresh
Missing Battle Shout / Not in melee range	—	out of combat / in combat, too far	shout before the pull / close in (Charge, Intercept)

> Forever hides combat data from addons, so the pack reacts to what the game shows: no combat log, no proc prediction, no Deep Wounds tracking. A few spell IDs (Enrage, Flurry, Blood Craze, Last Stand, Sweeping Strikes) are still to be checked in game: if one of those buffs never shows, note it. No Musca Auras? Use the Cooldown Manager instead (Warrior Guide).

5. Warrior quick reference

Spec	Priority
1-10	Battle Shout → Charge → Rend → Heroic Strike with spare rage; Thunder Clap on 2+; Hamstring runners
Arms (leveling pick)	Rend → Overpower whenever lit (Bloodthrill lights it more often) → Mortal Strike → Slam (15 s cd) → Execute <20% → Victory Rush after kills; Sweeping Strikes + Cleave on packs
Fury	Berserker Stance → Bloodthirst (needs Death Wish in the tree now) → Whirlwind → Execute <20% → Heroic Strike/Cleave with spare rage; Death Wish, Recklessness, Reckless Swings for big pulls
Protection	Defensive Stance (+80% threat) → Shield Slam → Revenge → Sunder; Thunder Clap + Demo Shout on packs; Shield Block, Shield Wall, Last Stand when it hurts

Level	Don't miss
10	Defensive Stance quest; Taunt, Sunder Armor, Bloodrage. Learn First Aid.
20	Victory Rush (new), Cleave, Slam, Retaliation, Dual Wield
25	Legacy panel: take **Talented** first (talent points from level 5, every character)
30	**The Affray** (Klannoc Macleod, The Barrens, 10-min timer): Berserker Stance + Intercept; Berserker Rage
36 / 38	Whirlwind (Whirlwind Weapon chain: Bath'rah, Alterac) / Pummel
40 / 50	Plate, riding, dual spec, Mortal Strike / Recklessness

Macros (Esc > Macros; names, so they always use your highest rank)

Button	Macro

Charge / Intercept	`#showtooltip`
	`/cast [nocombat,nostance:1] Battle Stance; [nocombat] Charge;`
	`[nostance:3] Berserker Stance; Intercept`

Overpower	`#showtooltip Overpower` `/cast [nostance:1] Battle Stance; Overpower`

Interrupt	`#showtooltip`
	`/cast [stance:3] Pummel; [equipped:Shields] Shield Bash; Berserker`
	`Stance`

Fear break	`#showtooltip Berserker Rage` `/cast [nostance:3] Berserker Stance; Berserker Rage`

Heroic Strike	`#showtooltip Heroic Strike`
	`/startattack`
	`/cast Heroic Strike`

6. Gold: a brand-new economy

TSM has no Forever build and no Forever market data, so **Auctionator** runs the auction house for now. Import the **Schizzle's Warrior Leveling** shopping list (repo: WoW Forever > Schizzle's Warrior > AddOns > Auctionator) in the **Shopping** tab > **Import**, and scan once a day.

When TSM updates, make these custom sources (they never use DBMarket):

Source	Formula
szfloor	`max(VendorSell * 1.25, 1c)`
szseen	`first(AtrValue, DBMinBuyout, DBRegionMarketAvg)`
szvalue	`first(szseen, Crafting, VendorSell * 4)`
szmat	`first(AtrValue, DBMinBuyout, VendorBuy, VendorSell * 4)`
szcraft / szmin	`first(Crafting, szvalue)` / `max(szfloor, szcraft * 1.1)`
szmax / szsnipe	`max(szvalue * 2, szfloor * 3)` / `max(szvalue * 0.6, szfloor)`

- First week: sell cloth, copper, herbs, light leather and bags while everyone levels.
- Post 2 h or 8 h while prices move; rescan before posting.
- Copper prices are allowed: undercut by 1c.
- No Pet Cages on Forever: only companions that are still items can be sold.
- The full group tree (all professions, dungeon BoEs by bracket, raid BoEs from Dec 9, companions) and operations are in the repo: WoW Forever > Schizzle's TSM.

7. Not ready on day one

Addon / app	Status	Do
TradeSkillMaster + AppHelper	no 16001 build	Use Auctionator; TSM plan is ready
TSM Desktop App	no Forever data	Nothing yet
WeakAuras	no Forever build	Musca Auras + the pack; the tray is built into the helper
Wago App / WagoAppCompanion	no Forever support	Leave off
LittleWigs	no Forever file	BigWigs covers bosses

8. Troubleshooting

Problem	Fix
No setup prompt	Type `/schizzle all`. With the private local file, only the named character is asked.
A piece says *skipped*	That addon isn't installed or enabled. Install it, then run its command.
A console variable says skipped	Forever doesn't have that setting; nothing to do.
Reload button does nothing	Type `/reload`.
Keys don't work	Esc > Key Bindings: untick *Character Specific Keybindings*, then `/schizzle binds`.
Bar 1 empty after a stance swap	Normal: drag abilities onto bar 1 once in each stance.
Tray missing	`/schizzle tray`. The XP bar hides at 60; the rep bar needs *Show as Experience Bar*.
Red errors	Click the BugSack minimap icon; note the first error and the addon named in it.
`/schizzle auras` says Musca isn't loaded	Install Musca Auras 1.14.0 (folder `WeakAuras`) and turn off any other WeakAuras copy.
Pack icons missing after an update	Run `/schizzle auras` again and import; it updates the same auras.
An addon "Out of date"	Don't tick *Load out of date AddOns*; update it from its Forever file.

9. In-game test list

- ☐ `/schizzle` lists every command; nothing installed says *(not loaded)*
- ☐ `/schizzle cvars`: seven set, none skipped; abilities fire on key down
- ☐ `/schizzle details`: two meter windows side by side, bottom right
- ☐ Tray: XP bar with level and rested %, hover tooltip, green quest XP grows on a completed quest
- ☐ Tray: watched faction shows as the second bar; guild bar in a guild with guild rep
- ☐ `/schizzle tray` hides and shows it
- ☐ Fira Sans Condensed in the tray, Bartender4 hotkeys and chat
- ☐ Q E R F T G Y + mouse buttons fire Bar 3; Shift versions Bar 2; A/D strafe
- ☐ Bar 1 swaps with stances from level 10
- ☐ BugSack stays quiet through a fight, a quest turn-in and a level-up
- ☐ Visual helper: *Missing Battle Shout* out of combat; Starter lane below 10, your tree's lane from 10
- ☐ Rage bar: grey under 15, red, bronze at 30, ember at 60; lane icons dim and light up
- ☐ Overpower (dodge), Execute (<20%) and Victory Rush (kill) light up with their sounds; HS/Cleave shows while queued
- ☐ Rend timer on the target; the lane's Rend glows when it drops. Sunder stacks, Thunder Clap and Demo Shout show

- [ ] Cooldown row changes with each stance; *Not in melee range* when you back off; swing bars fill
- [ ] Auctionator list imports and searches
